

SPEEDWAY PACKAGING MACHINERY

LM-W150/200-3PA Prism Aligner Wrap Labeler

This rugged machine is built to last and will provide decades of reliable service. The Prism Aligner system is ideal for tricky labelling jobs like imperfect glass bottles and applying labels to tapered containers. This is also our go-to system when a label needs to be oriented to a feature on the container such as a handle or an embossing.

The stainless steel construction ensures it will withstand the rigours of daily use and harsh environments.

An intuitive touch screen means operation is a breeze.

LM-W150/200-3PA

Prism Aligner Wrap Labeler

Specifications

Speed	Standard	Upgrade
Max Dispensing Speed	100ft/min (30m)	150 ft/min (45m)
Max Conveyor Speed	65ft/min(20m)	100ft/min(30m)
Dimensions and Weight	Standard	Optional
Applicator Height	6" (150mm)	8" (200mm)
Max Label Length	As Required	As Required
Conveyor Width	6" (150mm)	As Required
Conveyor Length	66" (1675mm)	As Required
Maximum Container Dia.	7" (175mm)	As Required
Approx. Net Weight	330lbs (150kg)	Varies
Spool Diameter / Core	14" (350mm) / 3" (76mm)	
Power		
Voltage	110 VAC 60 HZ 1 Phase	
Power	8 Amps	
Optional		
Coding	Inkjet Printer, TTO Printers, Hot Stamp Coder	
Sensors	Clear Label Sensor	
Performance	Label Driver Upgrade	
	Zero-Down-Time dual applicator	
Mobility	Adjustable Casters	
Efficiency	Infeed and accumulation turntables or shelf	

Key Features

- ◆ Best machine for tricky wrap labeling jobs
- ◆ Great accuracy with a small footprint
- ◆ Option to add an orientation function
- ◆ Stainless steel and anodized aluminum construction
- ◆ Touch screen control provides fast and easy setup
- ◆ Easy and quick changeovers for reliable label positioning
- ◆ Very flexible—can accept a wide range of label sizes
- ◆ Integrated missing label detection prevents miss labelling
- ◆ Adjustable printer dwell time adapts to different coders
- ◆ Stepper motor drive for accuracy
- ◆ Set label position with a touch of a button, no need to adjust the sensor
- ◆ Integrated programmable counter can be programmed to automatically stop machine when pre-set level is reached
- ◆ Casters can be added to adjustable leveling feet allowing the machine to be easily repositioned
- ◆ Easy to integrate into a production line or use in a stand alone operation
