MP90NG-CA Metering Pump Filler

Automatic Liquid Filler

The MP90NG-CA is an extremely versatile liquid filler that can easily handle both thin and viscous liquids. The design allows for bottom-up, subsurface fills, along with a microprocessor controlled profiled filling rate making this an ideal choice for filling foamy products. Accuracies of +/- 0.5 ml at typical for most products.

These inline fillers can be customized to suit any size container or conveyor length. Container sizes from 10 ml to 10 L can be accommodated.

MP90NG-CA Metering Pump Filler

Specifications

Voltage/Power -	220 V 1 PH 60 Hz or 208/480 V 3PH 60Hz
Controls	Microprocessor and touch screen HMI
Max. Bottle Height	As required
Nozzles	Stainless steel or PVC 3/8" up to 1 1/4"
Number of Nozzles	1 to 12 (or more) nozzles
Accuracy	+/- 1ml
Materials	Stainless steel and anodized aluminum
Dimensions (Approx).	L x W x H 115" x 50" x 86"
Optional	Drip tray Neck Guide Web Camera for Remote Troubleshooting Flushing Trough Guarding and Interlock Oversize tank

The MP90NG-CA has some incredible features allowing you fill some of the most challenging liquids!

- Fully automatic filler can be configured to operate 1 nozzle or up to 12 nozzles. Most machines are built with the ability to add nozzles should demand increase.
- Fully configurable nozzle dive / lift system with encoder that can be setup to fully dive for foam free (sub-surface) filling or as a partial dive with just a touch on the control panel screen.
- Large 10" touch screen display
- Bottle size memory for recipe calling to minimize changeover times
- Adjustable guide rails to accommodate bottles of any size
- No change parts needed for various types of containers
- Stainless steel and Aluminium construction
- 316L contact parts
- Options include data collection and flush trough for easy CIP procedures
