SPM-553SFTB Case Sealer

Side Belt Drive

Features:

The **SPM-553SFTB** uses a new taping head incorporating a V-shaped plate (patented) designed to keep the tape straight and in position for consistent sealing of every carton. Driven by two side drive belts, each belt has a separate drive mechanism using a special bearing bracket. This provides higher precision, lower noise and lengthens belt life. Tape overlap length can be adjusted from 55mm-65mm.

This machine also features:

- Detacher: to make taping more stabilized and smooth,
- Dual compression rollers: for tighter and smoother sealing.
- Sloped in feed to make flap-folding easier and convenient.

Machine comes standard without feed extension roller table (Not Shown)
L 500 mm x W 530 mm
