LF90CA-C/PD Inline Overflow Filler

Fully Automatic Liquid Filler

The LF90 Series of inline overflow fillers uses a modular design to satisfy a wide variety of filling needs.

These straight line fillers are constructed for pressure/gravity operation. Container sizes from 150 ml to 10 L can be accommodated. This economical filler is a proven design with hundreds currently in service.

LF90CA-C Inline Overflow Liquid Filler

LF90CA-PD Inline Overflow Liquid Filler

Specifications

Voltage	120/208 VAC 1/3 PH 60 HZ 1-2 HP
Power	10-15 amps
Controls	Panasonic PLC and Touch Screen
Max. Conveyor Speed	65' (20m)/ min.
Max. Bottle Height	15 3/4" (400 mm)
Conveyor Width	As Required
Air Consumption	2-3 c.f.m.
Nozzles	Stainless steel or PVC 3/8" up to 1 1/4"
Accuracy	+/- 1/32"
Optional	Drip tray Oversize tank Neck Guides
Material	Stainless steel and anodized aluminum construction

Dimensions

The LF90 Series of Inline Overflow Liquid Fillers has powerful features to meet production needs!!!

- ◆ LF90CA-C comes complete with a sanitary centrifugal pump.
- ◆ LF90CA-PD comes complete with a sanitary positive displacement pump.
- ◆ Pump draws from the built in tank sending liquid to the manifold and from there to the nozzles.
- ◆ Easy and fast adjustment for accurate fills.
- ◆ Can be adapted to different applications, allowing smooth production runs and no hassles for high efficiency.
- ◆ Built in stainless steel holding tank with level control.
- ◆ Overflow goes directly back into the holding tank.
- ◆ 316 stainless steel nozzles with Teflon seals and Viton o-rings.
- ◆ The hoses connect to a rigid top body preventing hose strain from effecting nozzle performance
- ◆ Easy to integrate into a production line or in stand alone operation
- ◆ Stainless steel threaded leveling feet.
- ◆ The machine is self contained needing only AC power, compressed air and to be connected to the main liquid supply.
