

SPEEDWAY

SPM-563 Semi-Automatic Case Erector & Pack Station

Side Belt Drive

Features:

The **SPM-563P** allows one person to form, pack and seal cartons in one operation. The operator opens the flat carton and places it into the erector. The machine folds the bottom flaps ready for packing. After packing, the operator presses the footswitch or pushbutton. The machine automatically pushes the carton into a case sealer, saving time and labour costs.
